The sealed 6mm ceramic top offers high cleaning comfort thanks to the flat surface and cleanability of glass ceramic. It is watertight fixed to the worktop, preventing any liquid infiltration. The cooking surface only heats up when in direct contact with induction friendly pans and pots, and the amount of heat is proportional to the surface of contact. The zone of the cooking surface not in contact with the pan remains deactivated and thus cold allowing a more comfortable working environment (lower heat emission) and a energy savings equal to 50% compared to traditional stoves. Each inductor has 6 different power levels and an indicator light shows when the top is in operation.
