The sealed 6 mm ceramic top offers high cleaning comfort thanks to the flat surface and cleanability of the glass. It is watertight fixed to the worktop, preventing any liquid infiltration. 1 mm worktop in AISI 18/10 stainless steel. Excellent alignment with joints.

Induction: The cooking surface only heats up when in direct contact with induction friendly pans and pots, and the amount of heat is proportional to the surface of contact. The zone of the cooking surface not in contact with the pan remains deactivated and thus cold allowing a more comfortable working environment (lower heat emission) and a energy savings equal to 50% compared to traditional stoves. Each inductor has 6 different power levels and an indicator light shows when the top is in operation.
